After the Crash Architecture in Post Bubble Japan Thomas

After the Crash is an anthology of essays that draw on firsthand observations of the built environment and architectural culture that emerged from the economically sober post-bubble period of the 1990s. Daniell uses projects and installations by architects such as Atelier Bow Wow, Toyo Ito, and the metabolists to illustrate the new relationships forged, most of necessity, between architecture and society in Japan.

After the Crash Architecture in Post Bubble Japan by

New Zealand-born architect Thomas Daniell arrived in Japan at the dawn of this turbulent decade. After the Crash is an anthology of essays that draw on firsthand observations of the built environment and architectural culture that emerged from the economically sober post-bubble period of the 1990s.

Japanese asset price bubble Wikis The Full Wiki

The Japanese asset price bubble (, baburu keiki?, lit. "bubble economy") was an economic bubble in Japan from 1986 to 1990, in which real estate and stock prices greatly inflated. [1] The bubble's collapse lasted for more than a decade with stock prices bottoming in 2003, until hitting an even lower low amidst the current global crisis in 2008.
